Earth Day Celebration!

APRIL 19 - AFTER WORSHIP

Since 1970, Earth Day has been a reminder and inspiration for all to protect our environment and to take action on environmental issues. Please come to a special service April 19, and gather in our garden afterwards. All are encouraged to help with garden chores (bring your gloves, small tools and work clothes). Our vegetable garden, headed by Jack Schipper, is an important ministry, providing food for parishioners and community alike. Help is always appreciated, but is especially fun when we work together. If gardening is not your interest, just take a tour!

Also, peruse the PLANT, SEED AND GARDEN PARAPHERNALIA table! This is your opportunity to bring in extra garden items from home, and leave with something new. There will be donated succulents, small starts, seedlings, wildflower seeds, decorative pots, second hand tools, maybe even gardening how-to books or ceramic gnomes.

We are also excited to announce that docents from the Petaluma Wildlife Museum will be joining us this year, bringing with them some of their favorite live animals insects!

Thanks to our Community Outreach Commission, snacks and drinks will be provided. We hope to see many visitors to our garden, and contribute to Earth Day awareness. Please come on out!
